Alec Reimel, Lead Full-Stack Developer

LOCATION: Doylestown, PA // PHONE: 610-908-6127 // EMAIL: alecreimel1@gmail.com
PORTFOLIO: alecreimel.com
EDUCATION: Bachelor of Science, Information Technology & Management, Syracuse University, 2012–2016
FOCUS: Full-Stack Development, Technical Leadership, AI Applications, Web Security, Marketing Technology

DEV PORTFOLIO

01 / TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, PHP, SQL, Python, C#, C++
- **Web Development:** React, Next.js, Node.js, Astro, WordPress, Tailwind CSS, shadcn/ui, Vue, Angular
- **Engineering:** Full-stack development, frontend and backend development, software architecture, SaaS, UI/UX, responsive design, web accessibility
- **Delivery & Operations:** Git, DevOps, continuous integration/continuous delivery (CI/CD), Netlify, Vercel, database administration
- **Security:** Website hardening, incident response, malware recovery, vulnerability monitoring, outage resolution
- **Applied AI:** AI agents, Model Context Protocol (MCP), OpenAI, Claude, Gemini, Ollama, self-hosted models, prompt engineering
- **AI Tools:** Claude Code, Cursor, LangChain, CrewAI, n8n, Palantir Foundry
- **Analytics & SEO:** Google Analytics 4 (GA4), Google Tag Manager (GTM), HubSpot, campaign attribution, user behavior tracking, technical SEO
- **Design Tools:** Figma, Adobe

05 / PERSONAL FACTS

- **Hobbies:** music, guitar, bass, synthesizer, reading, tv & movies
- **Fun Fact:** I used to have a side hustle making tiny biker vests for cats and dogs.

02 / PROFESSIONAL SUMMARY

Hands-on lead developer with 10+ years of professional web development experience spanning full-stack applications, frontend engineering, and marketing technology. Led a development team responsible for approximately 300 client websites and built shared tools for AI knowledge access, fleet monitoring, security operations, and workflow automation.

Combines React and Next.js development with technical leadership, web security, and analytics. Experience includes AI agents connected through Model Context Protocol (MCP), self-hosted AI applications, and reusable website templates that reduced development time from approximately two months to one or two weeks at multiple agencies.

03 / SELECTED AGENCY CLIENTS

Client work across roles includes Bristol Myers Squibb, Merck, Johnson & Johnson, Diageo, Brother Printers, Rutgers University, Rutgers Cancer Institute, NJM Insurance, Arm & Hammer, and Eggland's Best.

04 / PROFESSIONAL EXPERIENCE

Lead Developer – beMarketing

Duration: Dec. 2025 – Oct. 2026 // **Location:** Plymouth Meeting, PA
Sub-Roles: Technical Leadership, Full-Stack Development, Software Architecture, Applied AI, Web Security
Client Types: Small Business, Home Services, Lifestyle

ENGINEERING & LEADERSHIP:

- **Team Leadership:** Led an in-house and distributed development team, including two overseas contractors, supporting approximately 300 client websites. Established development standards, built reusable templates, and introduced AI-assisted coding workflows adopted across the team.
- **Web Development:** Created WordPress and Astro site templates to accelerate launches and standardize delivery. Oversaw new website builds and ongoing maintenance across the client portfolio.
- **Security & Operations:** Led hacked-site recovery, website hardening, and outage resolution. Served as the technical escalation point for account managers, leadership, and clients, explaining incidents and recovery actions.

NOTABLE PROJECTS & INITIATIVES:

- **HiveMind AI Knowledgebase:** Built a shared, live-updated knowledgebase accessible to AI agents through an MCP server. Created a Next.js intranet dashboard for employees to explore website fleet and client-site information.
- **Website Fleet Monitor:** Centralized monitoring for approximately 300 sites, covering uptime, software versions, known vulnerabilities, SSL, domains, hosting, performance, SEO, malware scans, and security alerts.
- **Agency Security Desk:** Built an incident tracker with response playbooks, hardening checklists, and staff training resources. Linked threat actors across incidents to identify patterns and gave account managers and leadership visibility into security status.
- **ClickUp Automation Suite:** Built team-adopted tools to reconstruct timesheets from Git history, generate website build reports, and package task context for AI coding sessions.
- **Internal Developer Tools:** Set up an intranet server for self-hosted applications and built an AI prompt library and reusable application template.

OUTCOMES & IMPACT:

- **Workflow Automation:** Deployed open-source and in-house automation tools for timesheets, build reports, and AI coding task handoff, saving the team 30–40+ hours of manual work per week.
- **Faster Site Launches:** Cut new website build time from approximately two months to two to three weeks with standardized WordPress and Astro templates and AI-assisted coding workflows.
- **Incident Response:** Resolved 50+ security incidents amid a wave of AI-powered attacks. After a leaked SendGrid API key suspended email for all clients, scripted same-day key rotation across ~300 sites.
- **Uptime & Monitoring:** Maintained 99.9% uptime across ~300 client websites, with the Website Fleet Monitor flagging outages, vulnerabilities, and security incidents within 24 hours.
- **AI Adoption:** Drove AI adoption beyond engineering: onboarded department heads to automation workflows, built reusable AI project harnesses for different site types, and introduced non-developers to Claude Code and tools like HyperFrames, now the company standard for pitch decks and presentations.

06 / ROLE

Professional Experience — Continued

Senior Developer – The Grovery (formerly Mota 9)

Duration: Oct. 2022 – Aug. 2025 // **Location:** Lambertville, NJ
Sub-Roles: Technical Leadership, Software Architecture, DevOps, Applied AI, Marketing Analytics
Client Types: Pharmaceuticals, Healthcare, Lifestyle, Retail

ENGINEERING & LEADERSHIP:

- **Development Modernization:** Led adoption of modern web development practices and mentored colleagues in Git and React to expand the team's delivery capabilities.
- **Web Applications:** Developed brand and campaign websites with user behavior tracking and marketing measurement integrations for pharmaceutical, healthcare, and consumer clients.
- **Analytics Ownership:** Led HubSpot, Google Analytics, and Google Tag Manager projects. Applied a custom tracking toolkit to campaign measurement and attribution, and developed features supporting AI search visibility.
- **Applied AI Development:** Led research and development of AI chatbots, agents, and content generation applications, including locally hosted models on company servers.

SELECTED APPLICATIONS & EXPERIENCES:

- **Company Knowledgebase:** Built an employee training and reference application with an agentic AI assistant supporting ChatGPT, Google Gemini, Claude, and locally hosted Ollama models.
- **AI Marketing Advisor:** Built a personalized advisor using multiple AI agents and MCP tools to research companies and develop marketing recommendations.
- **Interactive Event Kiosks:** Developed animated, touch-first experiences for tablets and large-format displays at live events and trade shows.
- **Campaign Analytics:** Developed user behavior tracking code to measure campaign effectiveness and attribution.
- **Augmented Reality Campaign:** Developed a phone-based augmented reality video experience for a pharmaceutical marketing campaign recognized with an NJ Ad Award.

07 / ROLE

React Developer – Thorium Digital

Duration: Nov. 2020 – Oct. 2022 // **Location:** East Brunswick, NJ
Sub-Roles: Technical Project Leadership, UI/UX, Developer Onboarding, Mentoring, Marketing Analytics
Client Types: Retail, Beverage

SELECTED CONTRIBUTIONS:

- **Reusable React Websites:** Built conversion-focused lead generation websites and standardized recurring builds into reusable templates, reducing required development time from approximately two months to one or two weeks.
- **Tracking & Analytics:** Owned Google Tag Manager and Google Analytics work and trained colleagues to implement and use campaign tracking tools.
- **Developer Enablement:** Documented project templates and mentored junior developers during onboarding, helping new hires learn the technology stack and procedures while contributing to client projects.

08 / ROLE

Lead Frontend Developer – Oxford Communications

Duration: Jun. 2016 – Jul. 2020 // **Location:** Lambertville, NJ
Sub-Roles: Frontend Engineering, Full-Stack Development, UI/UX, Technical SEO, Marketing Analytics
Client Types: Pharmaceuticals, Healthcare, Lifestyle, Retail

SELECTED CONTRIBUTIONS:

- **Frontend & Full-Stack Development:** Built responsive websites with an emphasis on frontend engineering, usable interfaces, and UI/UX, while handling full-stack development needs.
- **Marketing Measurement:** Implemented campaign tracking and analytics tools and developed a reusable user tracking toolkit carried forward into subsequent roles.
- **SEO & Accessibility:** Implemented technical SEO and accessibility improvements to support discoverability, campaign performance, and access for users with disabilities.

09 / ROLE

Web Design & Recruiting Intern – Kane Partners

Duration: Sept. 2014 – Jun. 2016 // **Location:** Lansdale, PA
Sub-Roles: Web Design, Social Media, Copywriting, Research
Client Types: Technology, Software Development, Engineering
